Final Micro Pico Configuration For Lab 0:
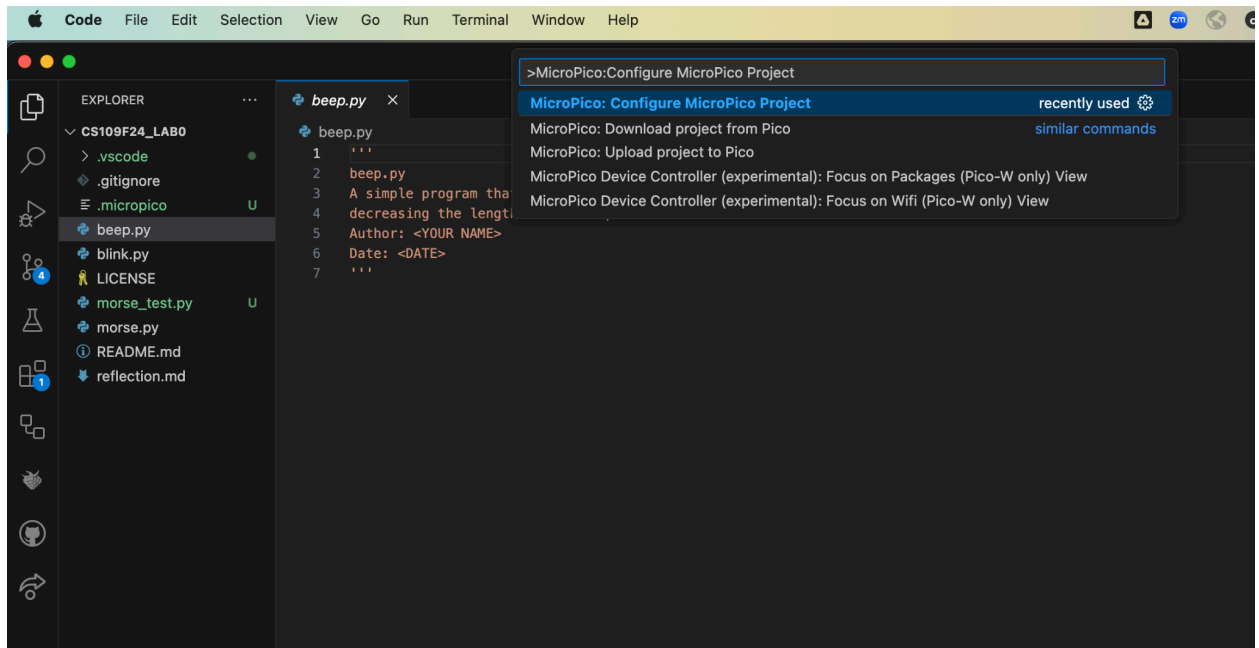

1) Open your Lab 0 folder (repo) in VSCode.

2) If you are on a Mac, hit command-shift-p. If you are on Windows or Linux, hit ctrl-shift-p.

   You should see a text input box popup at the top in the middle like the screenshot below:

3) Type MicroPico: Configure MicroPico Project into that textbook (like in the screenshot) and hit Enter.

4) After this, you should see the Micro Pico controls show up in the bottom statusbar of VS Code, like in the screenshot below:
